

# Curriculum vitae

## Andrew Wiltshire

Environmental Scientist

Andrew's experience includes project work across a range of environmental disciplines. Andrew has experience in the preparation of environmental assessments (EAs), reviews of environmental factors (REFs), environmental management plans (EMPs), environmental compliance audits, and community information and liaison. These projects include:

- Preparation of the Berrima Colliery Continued Operations EA.
- Preparation of REFs and CEMPs for the rehabilitation of sewer lines using trenchless technology in environmentally sensitive environments.
- Preparation of an EMP for Boral Cement's manufacturing plant on Kooragang Island, Newcastle
- Assisting in environmental compliance audits and report preparation for a number of quarries and mines in NSW.
- Ongoing community liaison for a coal mine in the Southern Highlands of NSW.

### Fields of Competence

- Environmental review, planning and impact assessment
- Environmental management plans
- Written presentation

### Education

- Bachelor of Science (Geography), University of Auckland
- Postgraduate Diploma of Science (Environmental Management), University of Auckland
