

# Curriculum vitae

## Rachael Russell

### Environmental Planner

Professionally qualified in environmental planning, town planning and biological sciences.

Experience includes project management and project work for various sectors, environmental assessments, review of environmental factors, statements of environmental effects, planning proposals, audits and ecotourism operations.

Rachael has been involved in the preparation and project management of development and project applications for several sectors, including: community services; energy; extractive industries; health services; mining; residential; and tourism.

Her responsibilities involved consultation with regulatory authorities, project management of sub-consultants, data collection, interpretation of technical reports and report production and submission.

Rachael has been involved in the preparation of environmental assessments under Part 3A of the Environmental Planning and Assessment Act 1979 for coal mines, extractive industry, residential and tourist development.

Rachael has assisted with the modification of development consents and licences for gas plants and extractive industries. Rachael project managed modifications to development consents for health services, residential and tourism operations.

Rachael has assisted in the preparation of environmental compliance audits for extractive industries in NSW.

Rachael has provided advice to clients and prepared submissions on the planning process of NSW including planning legislation and environmental planning instruments.
